▶ History of Audi at the Aurangabad site	3
▶ Facts and figures	4
▶ Fuel consumption of the models named above	4

▶ **The Aurangabad site**

AUDI AG has been producing automobiles at its site in Aurangabad in the Indian federal state of Maharashtra since September 2007. The Audi A3 Sedan*, Audi A4 Sedan*, Audi A6 Sedan* and the Audi Q3*, Audi Q5* and Audi Q7* are produced at the plant of Skoda Auto India Private Limited (SAIPL). In addition, SAIPL produces the Volkswagen Tiguan and Passat as well as the Škoda models Kodiaq, Octavia and Superb in Aurangabad.

In the spring of 2007, an independent sales company was founded to coordinate the business activities of Audi in the Indian market. As well as producing the six Audi models Audi A3 Sedan*, Audi A4 Sedan*, Audi A6 Sedan*, Audi Q3*, Audi Q5* and Audi Q7* for the Indian market, Audi also imports models including the Audi A3 Cabriolet*, Audi A5 Sportback*, Audi S5 Sportback*, Audi RS 6 Avant*, Audi A8 L* and Audi R8 V10 plus.

▶ **Review of 2017**

AUDI AG at the site in Aurangabad produced 6,513 automobiles in 2017 (2016: 5,667). This means that a total of 58,295 automobiles have been produced there since the start of production.

▶ **Production**

The entire production concept in Aurangabad is closely based on the small-series production. The Indian employees first pass through comprehensive training courses at the Neckarsulm plant before they take up their demanding tasks in Aurangabad. Production takes place on four production lines. One of these is used for the Audi A4 and the Audi Q5, whereas the Audi A6 and Audi Q7 are being produced on a separate production line and the Audi A3 together with the Audi Q3.

▶ **Logistics**

When the individual parts are installed in one of the Audi models in Aurangabad, they have a long journey behind them. They are first transported by train from the European production sites to the port in Hamburg, Bremerhaven or Antwerp; the Audi Q3* comes directly from Barcelona, Spain. From there, the individual parts are transported by ship through the Mediterranean Sea and the Suez Canal to the port of Nhava Sheva in Mumbai – covering a distance of about 11,000 kilometers (*6,835 miles*). They are transported the last 480 kilometers (*298 miles*) from Mumbai to Aurangabad by truck.

With the development of the Indian market, Audi is continuing its success story and growth trend, and is investing in an automobile market with very high potential.

▶ **History of Audi at the Aurangabad site**

- 1999 Skoda Auto India Private Limited (SAIPL) is founded.
- 2001 Skoda starts production of automobiles.
- 2007 Audi decides to produce automobiles at SAIPL in Aurangabad. Production of the Audi A6 Sedan starts in September 2007.

Production:	1,879,840 automobiles (including Lamborghini and CKD)

(all information as at December 31, 2017)

Audi at the Aurangabad site

Area:	300,000 m ²
Audi start of production:	2007
Models*:	Audi A3 Sedan, Audi A4 Sedan, Audi A6 Sedan, Audi Q3, Audi Q5, Audi Q7
Production:	6,513 automobiles

(all information as at December 31, 2017)

► **Fuel consumption of the models named above***

Fuel consumption of the Audi A3 Sedan

Combined fuel consumption in l/100 km: 8.4 - 3.9 *(28 - 60.3 US mpg)*

Combined CO₂ emissions in g/km: 191 - 102 *(307.4 - 164.2 g/mi)*

Fuel consumption of the Audi A3 Cabriolet

Combined fuel consumption in l/100 km: 6.8 - 4.3 *(34.6 - 54.7 US mpg)*

Combined CO₂ emissions in g/km: 156 - 113 *(251.1 - 181.9 g/mi)*

Fuel consumption of the Audi A4 Sedan

Combined fuel consumption in l/100 km: 7.7 - 3.7 *(30.5 - 63.3 US mpg)*

Combined CO₂ emissions in g/km: 174 - 95 *(280 - 152.9 g/mi)*

Fuel consumption of the Audi A5 Sportback

Combined fuel consumption in l/100 km: 7.7 - 4.1 *(30.5 - 57.4 US mpg)*

Combined CO₂ emissions in g/km: 174 - 106 *(280 - 170.6 g/mi)*

Fuel consumption of the Audi S5 Sportback

Combined fuel consumption in l/100 km: 7.7 – 7.5 (30 – 31.4 US mpg)

Combined CO₂ emissions in g/km: 174 – 170 (280 – 273,6 g/mi)

Fuel consumption of the Audi A6 Sedan

Combined fuel consumption in l/100 km: 9.4 - 4.2 (25 - 56.0 US mpg)

Combined CO₂ emissions in g/km: 218 - 109 (350.8 - 175.4 g/mi)

Fuel consumption of the Audi RS6 Avant

Combined fuel consumption in l/100 km: 9.6 (24.5 US mpg)

Combined CO₂ emissions in g/km: 223 (358.9 g/mi)

Fuel consumption of the Audi A8 L

Combined fuel consumption in l/100 km: 8 – 5.6 (29.4 – 42 US mpg)

Combined CO₂ emissions in g/km: 182 – 146 (292.9 – 235 g/mi)

Fuel consumption of the Audi Q3

Combined fuel consumption in l/100 km: 8.6 - 4.2 (27.4 - 56.0 US mpg)

Combined CO₂ emissions in g/km: 203 - 109 (326.7 - 175.4 g/mi)

Fuel consumption of the Audi Q5

Combined fuel consumption in l/100 km: 8.5 - 4.5 (27.7 - 52.3 US mpg)

Combined CO₂ emissions in g/km: 195 - 117 (313.8 - 188.3 g/mi)

Fuel consumption of the Audi Q7

Combined fuel consumption in l/100 km: 7.6 - 5.5 (30.9 - 42.8 US mpg)

Combined CO₂ emissions in g/km: 199 - 144 (320.3 - 231.7 g/mi)

*Fuel consumption and CO₂ emissions figures given in ranges depending on the tires/wheels used. Further information on official fuel consumption figures and the official specific CO₂ emissions of new passenger cars can be found in the "Guide on the fuel economy, CO₂ emissions and power consumption of all new passenger car models," which is available free of charge at all sales dealerships and from DAT Deutsche Automobil Treuhand GmbH, Hellmuth-Hirth-Str. 1, 73760 Ostfildern-Scharnhausen, Germany (www.dat.de).
