

## **A new name, plenty of sportiness, and more equipment – updates for the Audi A1, Audi A4 allroad quattro, Audi Q7, and Audi Q8**

- **The popular Audi A1 citycarver\* will get a new name in the 2023 model year: Audi A1 allstreet\***
- **New Black Optics Pro Package for the Audi A4 allroad quattro\***
- **New color options and a newly enhanced interior for the Audi Q7 and Audi Q8**

**Ingolstadt, 12 May 2022 – No less than four of the Four Rings’ models will receive exciting updates in the new model year. The compact Audi A1 citycarver\* opens the quartet with a new model name – with immediate effect, it is called the Audi A1 allstreet\*. The all-rounder in the mid-range category, the Audi A4 allroad quattro\*, will get a new sporty optics package that sets black accents on the exterior. In the luxury class, Audi is expanding the standard equipment in the Audi Q7 and Audi Q8, both of which will now be available in three new metallic finish color options.**

### **New name, same intensity**

The most individual model of the Audi compact series is receiving a new name. The Audi A1 citycarver will now be called the Audi A1 allstreet\*. With its sporty, streamlined lines based on the Audi A1 Sportback\*, the compact car will stay true to its popular, robust off-road look. All equipment and customization options previously on offer as well as the previously available engine/transmission combinations will also remain. The price in Germany also remains the same, starting at at 23,200 euros.

### **Audi A4 allroad quattro\* with a new equipment package**

With the Black Optics Pro Package, the Audi A4 allroad quattro\* is getting a new equipment package in the new model year. Specifically designed for the A4 allroad quattro\*, the new package will give customers even more customization options. The optional package features a windshield frame, exterior mirrors, and tailpipes highlighted in glossy black. Additionally, the vertical elements and the frame of the Singleframe grille, the clips in the front side air intakes, the rear diffuser trim, and the tailgate trim between the lights also come in glossy black. The expressive character of the A4 allroad quattro\* is further underscored with four glossy black rings in the front and rear as well as lettering spelling “A4 allroad”.

*The equipment, data and prices specified in this document refer to the model range offered in Germany. Subject to change without notice; errors and omissions excepted.*

*\*The collective fuel/electric power consumption and emissions values of all models named and available on the German market can be found in the list provided at the end of this text.*

Audi also delivers the roof rails in black. The bumper, which comes in Matte Structure Gray in the standard version, is now optionally available in contrasting Manhattan Gray Metallic. Customers can order the Black Optics Pro Package for the Audi A4 allroad quattro\* starting in Germany on 12 May for 775.00 euros. Plus, the new metallic finish color options Chronos Gray and District Green now round out the already wide array of colors available.

### **Standard equipment expanded for the Audi Q7 and Audi Q8**

The two SUVs in the luxury class, the Audi Q7 and Audi Q8, are getting a freshly accented look. In the new model year, both models will come in three new exterior colors. The new metallic finish color options Satellite Silver, Waitomo Blue, and Tamarind Brown will replace the previous tones Florett Silver, Galaxy Blue, and Barrique Brown in the models' wide array of available colors. In the interior, both models will come standard with elegant contrasting stitching on the instrument panel; the interior elements on offer will also be updated.

---

The Audi Group is one of the most successful manufacturers of automobiles and motorcycles in the premium and luxury segments. The brands Audi, Ducati, Lamborghini and Bentley produce at 21 locations in 13 countries. Audi and its partners are present in more than 100 markets worldwide.

In 2021, the Audi Group delivered around 1.681 million cars from the Audi brand, 8,405 sports cars from the Lamborghini brand and 59,447 motorcycles from the Ducati brand to customers. In the 2021 fiscal year, AUDI AG achieved a total revenue of €53.1 billion and an operating profit before special items of €5.5 billion. More than 89,000 people all over the world work for the Audi Group, around 58,000 of them in Germany. With its attractive brands, new models, innovative mobility offerings and groundbreaking services, the group is systematically pursuing its path toward becoming a provider of sustainable, individual, premium mobility.

---

**Fuel/electric power consumption and emissions values\*\* of the models named above:****Audi A1 citycarver/allstreet**

Combined fuel consumption in l/100 km: 5,2-4,9 (45.2-48.0 US mpg);  
combined CO<sub>2</sub> emissions in g/km: 119-112 (191.5-180.2 g/mi)

**Audi A1 Sportback**

Combined fuel consumption in l/100 km: 5,6-4,6 (42.0-51.1 US mpg);  
combined CO<sub>2</sub> emissions in g/km: 128-106 (206.0-170.6 g/mi)

**Audi A4 allroad quattro**

Combined fuel consumption in l/100 km: 7,2-4,8 (32.7-49.0 US mpg);  
combined CO<sub>2</sub> emissions in g/km: 168-126 (270.4-202.8 g/mi)

*\*\*The indicated consumption and emissions values were determined according to the legally specified measuring methods. Since September 1, 2017, type approval for certain new vehicles has been performed in accordance with the Worldwide Harmonized Light Vehicles Test Procedure (WLTP), a more realistic test procedure for measuring fuel consumption and CO<sub>2</sub> emissions. Since September 1, 2018, the WLTP has gradually replaced the New European Driving Cycle (NEDC). Due to the more realistic test conditions, the consumption and CO<sub>2</sub> emission values measured are in many cases higher than the values measured according to the NEDC. Additional information about the differences between WLTP and NEDC is available at [www.audi.de/wltp](http://www.audi.de/wltp).*

*At the moment, it is still mandatory to communicate the NEDC values. In the case of new vehicles for which type approval was performed using WLTP, the NEDC values are derived from the WLTP values. WLTP values can be provided voluntarily until their use becomes mandatory. If NEDC values are indicated as a range, they do not refer to one, specific vehicle and are not an integral element of the offer. They are provided only for the purpose of comparison between the various vehicle types. Additional equipment and accessories (attachment parts, tire size, etc.) can change relevant vehicle parameters, such as weight, rolling resistance and aerodynamics and, like weather and traffic conditions as well as individual driving style, influence a vehicle's electric power consumption, CO<sub>2</sub> emissions and performance figures.*

*Further information on official fuel consumption figures and the official specific CO<sub>2</sub> emissions of new passenger cars can be found in the "Guide on the fuel economy, CO<sub>2</sub> emissions and power consumption of all new passenger car models," which is available free of charge at all sales dealerships and from DAT Deutsche Automobil Treuhand GmbH, Hellmuth-Hirth-Str. 1, 73760 Ostfildern-Scharnhausen, Germany ([www.dat.de](http://www.dat.de)).*
